Shop and office

Architects (joint venture)

Yoshio Taniguchi & Associates (JP) and
Kajima Design (JP)

General Contractor

Kajima Corporation (JP)

Facade builder

Asahi Building-Wall Co., Ltd., Singapore (SG)

Glass manufacturer

Singapore Safety Glass Pte. Ltd., Singapore (SG)

Foil

SentryGlas® supplied by Kuraray/DuPont

[ProjectInfo]

Glass with integrated SEFAR® Architecture VISION fabric changes between transparency and reflection and can mirror the environment in different ways. This layout was chosen by the architects as they wanted a design using glass which has a texture resembling a metal look.

The laminated glass fins are installed in a spider system and supported by 4 points in the corner. The fins are not applied on the complete facade, they just give an accent of decoration. With the special play of light structures also shade is achieved.
