Technical List: Open Mesh Fabrics

Product Features

Appliance Products

Inherent to our synthetic materials are:

- Good fatigue properties compared to metal mesh
- Easy to handle and no sharp edges
- High strength and tear resistance
- Non-shedding properties

Open mesh fabric

- High precision and reliable mesh opening

Closed mesh fabric

- Highly efficient particle retention

- Low pressure drop
- High throughput
- Various surface modifications available
- Excellent surface properties
- High performance polymers for extreme and harsh conditions

SEFAR AntiBac Technology

Sefar has developed a special anti-microbial fabric that does not need any coating and is nonetheless highly efficient. The silver particles integrated in the polymer are a fixed component of the yarn. Silver ions are universally effective against 650 types of bacteria. The respected Hohenstein Institut confirms the strong anti-microbial effect.

Micro-organism tries to form a colony absorbing Ag+ and dies off after contamination with Ag+

Hydrophobic and hydrophilic coating

Sefar has wet-chemical coating capabilities for hydrophobic and hydrophilic

properties and is equipped with plasma machines, which produce the same result. Oleophobic and oleophilic properties are achievable with both procedures.

Hydrophobic / Oleophobic (coating or plasma)
Most coatings are fluoropolymer-based solids.

Hydrophilic / Oleophilic (coating or plasma)
Most coatings have an affinity for water, oils or oily materials.

Fabrication & Converting Solutions

Information on our fabrication capabilities can be found by following the links below:

■ Customer specific

Please call us for further information. We will also gladly send you fabric samples!
